

Donating products to help change the world

The products we donate to organizations around the world benefit many causes, including: supporting researchers in developing countries, advancing research into personalized medicine and promoting STEM education through hands-on activities in laboratories.

IN PRODUCTS DONATED THROUGH IN-KIND CONTRIBUTIONS

Exposing students to advanced instrumentation

We donated a Thermo Scientific TSQ Quantum Ultra Triple Quadrupole Mass Spectrometer System and Thermo Scientific Dionex Ultimate 3000 UHPLC System to Students 2 Science (S2S). These instruments will enable S2S to perform high-level quantitation of their routine laboratory analysis while providing the functionality and flexibility to expand their scientific research efforts and methods.

Matching our employees' passion and generosity

We encourage our employees to pursue their own philanthropic passions. And to help them make an even bigger impact on causes and organizations close to their hearts, we established an internal Employee Matching Gift program. Through this program, Thermo Fisher provides a 50% match of employee contributions to their charitable organizations of choice.
